

Rx to: Protect your health from VIRUS-GERMS and BACTERIA

The **INDUCT 2000**, "Air Scrubber" from ActivTek Environmental, is featuring the latest in "State of the Art" Air Purifying Techniques for the 21st Century!

Using technology invented by NASA researchers and developed for use in the *International Space Station*, to reduce exposure to harmful contaminants in our environment. The "Active Pure Technology" is revolutionizing the way we now control the spread of Viruses, Germs and Bacteria in our environment and especially in our air! This newest in air purification processes goes further than any typical UV sterilizer light.

The **INDUCT 2000** eliminates Viruses, Black molds (Stachybotrys chartarum), Fungi, Staph (Staphylococcus aureus) 98.5%, Strep (Streptococcus spp.) 96.4% , the entire **Anthrax Family** (Bacillus spp.) 99.38%, **E-Coli** (Escherichia coli) 98.1%, and much more using **Hydrogen Peroxide, Hydroxides and Ozonide Ions (H₂O₂)** to form clusters that absorb into the air and kill all "Volatile Organic Compounds" (VOC's)

"Ozone Free" Ultra Violet light, using a "Photo catalytic Process"

The key components of the device are the honeycomb surface and the Ozone Free, U.V. Lamp. The honeycomb surface is painted with titanium dioxide and a "Secret Coating" of other

reactive metals. The broad spectrum of the UV light emits wavelengths of primarily 185 nanometers and 254 nanometers. When oxygen and ambient humidity are introduced, there is a catalytic reaction that takes place.

At the honeycomb surface of the cell, there are about 13 different gasses that are created by this reaction. As this 'Plasma' (collection of charged particles) leave the cell, they recombine into charged clusters of hydrogen and oxygen. These clusters are called "multi-polar" or "bi-polar" clusters, since both the positive and the negative charged molecules are present. These clusters could contain any number of individually charged ions being clumped together.

Proven technology is 'SAFE' for our health when using the "Ozone Free" Ultra Violet Photo Catalytic Process". Today we have to watch out for much more contaminants than ever before.

HELP PROTECT YOUR FAMILY with ActivePure Technology.

It has been proven to destroy up to 99.9% of all SURFACE BACTERIA, VIRUSES & GERMS it has been tested on.

E Coli

MRSA Superbug

Staph

Strep

Avian Bird Flu H5N8

Black Mold

Avian Bird Flu... Swine Flu... WHAT STRAIN IS NEXT?

A University of Cincinnati study also states that the activTek Air Scrubber can **REDUCE APPROXIMATELY 90% OF AIRBORNE MICRO ORGANISMS**.

How else can we eliminate most of the serious infectious contaminants lurking in our environment like; odor's from animals, smokers, cooking odors, food products, household cleaners, laundries, kitchens counter tops and cooking areas, homes with stale air even from the U.S. Mail, and the list goes on.

Have an "INDUCT 2000 Air Scrubber" installed on your systems at home and business today. Let's start getting serious with our health!
