

Rx for: ENERGY SAVINGS

Separate the bedroom area from the living room areas in your home, with a

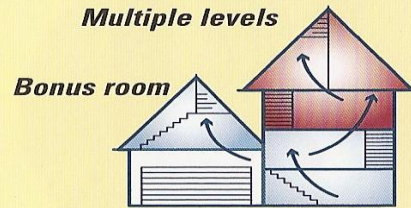

ZONE CONTROL SYSTEM

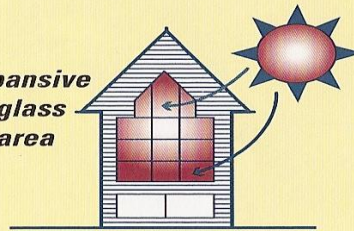

Using separately controlled thermostats, the system can control up to four areas or a typical design of two different zones.

Zoning delivers better comfort control for various types of floor plans

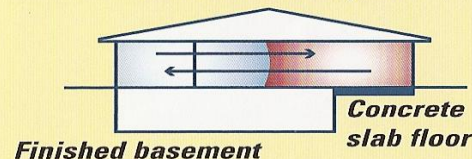

Multiple levels

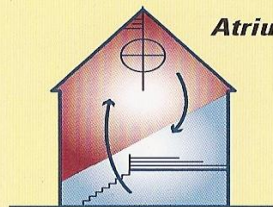

Expansive glass area

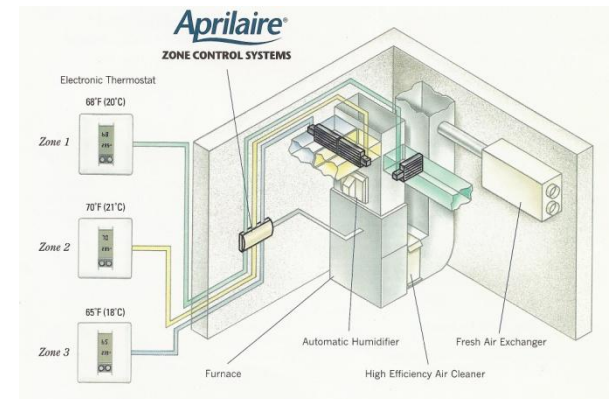

Horizontal floor plan

Atrium

You can now air condition or heat separate areas in your home, and reduce energy at the same time.

Shut down those areas, not in use, and direct the air to the areas you're occupying.
